No More Back-Breaking Scuttles To Be Carried Up Those Cellar Stairs

If you buy coal in large quantities you must have room to store it; if in small quantities, it is expensive. When you want to use it you must carry it from its storage place to your range, and of all tasks that is one of the most weary.

When you burn wood or coal you have the heat, dirt, and the trouble of attending to the fire. If you use gas you require no room for storage; no back-breaking scuttles to be carried from the cellar to the kitchen. The fire in the gas range burns steadily and without attention; it is always ready, without dirt or trouble, in large or small quantities.
